CONTENTS

ARITHMETIC

1. Number System 1-21

• Numerals • Face and Place Values of the Digits in a Number • Types of Numbers • Operations on Numbers • Divisibility Tests • Unit's Digit of an Expression • Binary Number

2. Number Series 22-41

• Types of Series • Types of Questions Asked on Number Series

3. Simple and Decimal Fractions 42-58

• Simple Fraction • Operations on Simple Fractions • Comparison of Simple Fractions • Operations on Simple Fractions • Decimal Fraction • Operations on Decimal Fractions

4. HCF and LCM 59-80

• Factors and Multiples • Least Common Multiple (LCM) • Highest Common Factor (HCF) • Formulae to Calculate LCM and HCF of Fractions • Fast Track Techniques to Solve of the Questions • Method to Solve of Questions Based on Application of HCF and LCM

5. Square Root and Cube Root 81-96

• Square • Square Root • Properties of Squares and Square Roots • Cube • Cube Root • Properties of Cubes and Cube Roots • Fast Track Techniques to Solve the Questions

6. Simplification 97-114

• BODMAS Rule • Some Algebraic Formulae • Approximation • Binary Operations

7. Average 115-140

• Properties of Average • Important Formulae Related to Average of Numbers • Fast Track Techniques to Solve the Questions

8. Ratio and Proportion 141-163

• Ratio • Comparison of Ratios • Proportion • Fast Track Techniques to Solve the Questions

9. Problems Based on Ages 164-175

• Important Rules for Problems Based on Ages • Fast Track Techniques to Solve the Questions

10. Percentage 176-205

• Fast Track Techniques to Solve the Questions

11. Profit and Loss 206-238

• Fast Track Techniques to Solve the Questions

12. Discount 239-256

• Marked Price (List Price) • Successive Discount • Fast Track Techniques to Solve the Questions

13. Simple Interest 257-278

• Simple Interest (SI) • Instalments • Fast Track Techniques to Solve the Questions

14. Compound Interest 279-300

• Basic Formulae Related to Compound Interest • Instalments
• Fast Track Techniques to Solve the Questions

15. Partnership 301-317

• Types of Partnership • Types of Partners • Fast Track Techniques to Solve the Questions

16. Mixture or Alligation 318-333

• Mixture • Rule of Mixture or Alligation • Fast Track Techniques to Solve the Questions

17. Work and Time 334-366

• Basic Rules Related to Work and Time • Fast Track Techniques to Solve the Questions

18. Pipes and Cisterns 367-384

• Important Facts Related to Pipes and Cisterns • Fast Track Techniques to Solve the Questions

19. Speed, Time and Distance 385-411

• Basic Formulae Related to Speed, Time and Distance
• Fast Track Techniques to Solve the Questions

20. Problems Based on Trains 412-435

• Basic Rules Related to Problems Based on Trains • Fast Track Techniques to Solve the Questions

21. Boats and Streams 436-452

• Fast Track Techniques to Solve the Questions

22. Questions Based on Races 453-462

• Important Terms Related to Races and Games of Skill • Some Facts about Race • Fast Track Techniques to Solve the Questions

23. Clock and Calendar 463-477

• Clock • Fast Track Techniques to Solve the Questions • Calendar • Day Gain/Loss

ALGEBRA

24. Algebraic Polynomial and Identities 478-494

• Algebraic Polynomial • Algebraic Identities • Remainder Theorem • Zeroes of Polynomial • Factors of Polynomials • To Find to Value of Algebraic Expression

25. Linear Equations 495-508

• Linear Equations in One Variable • Linear Equations in Two Variables • Consistency for the System of Linear Equations

26. Quadratic Equations 509-525

• Methods of Solving Quadratic Equations • Important Points Related to Quadratic Equations • Fast Track Formulae to Solve the Questions

27. Linear Inequalities 526-532

• Linear Inequality • General Rules to Solve Linear Inequalities • Solution of Linear Inequalities in Two Variables • Questions Based on Quadratic Inequalities • Solution of Quadratic Inequalities

28. Progressions 533-543

• Arithmetic Progression • Geometric Progression • Harmonic Progression • Relation between Arithmetic mean, Geometric mean and Harmonic mean

29. Indices and Surds 544-558
• Indices • Surds • Operations on Surds

30. Logarithm 559-566
• Fundamental Rules of Logarithms • Common Logarithm and Natural Logarithm • Antilogarithm Rules for Inserting Decimal Point

31. Set Theory 567-577
• Sets • Representation of Sets • Types of Sets • Subset • Power Set • Universal Set • Venn Diagram • Operations on Sets • Important Results Based on Sets

32. Permutations and Combinations 578-591
• Factorial • Permutation • Combination • Fundamental Principles of Counting • Fast Track Formulae to Solve the Questions

33. Probability 592-609
• Important Terms Related to Probability • Event • Rules/Theorems Related to Probability • Conditional Probability • Types of Questions

GEOMETRY

34. Line and Angles 610-620
• Point • Line • Line Segment • Perpendicular Lines • Parallel Lines • Transversal Lines • Angle • Types of Angles

35. Triangles 621-648
• Classification of Triangle • Some Term Related to Triangle • Some Important Results of a Triangle • Congruent Triangles • Similar Triangles • Some Results on Similar Triangles • Criteria for Similarity of Two Triangles • Area of Similar Triangles

36. Quadrilateral and Polygon 649-660
• Quadrilateral • Types of Quadrilaterals • Polygons • Types of Polygons

37. Circle 661-684
• Important Terms related to circles • Cyclic Quadrilateral • Properties of Cycle Quadrilateral

COORDINATES GEOMETRY

38. Cartesian System 685-694

• Rectangular Coordinate Axes • Quadrants • Distance Formulae • Area of Triangle • Collinearity of Three Points • Centroid of a Triangle • Cirumcentre • Incentre • Section Formulae • Locus and Reflection of Points

39. Straight Lines 695-702

• Basic Points Related to Straight Lines

MENSURATION

40. Area and Perimeter 703-745

• Area • Perimeter • Triangle • Types of Triangles • Properties of Triangles • Quadrilateral • Types of Quadrilaterals • Regular Polygon • Circle • Semi-circle • Circular Ring • Fast Track Techniques to Solve the Questions

41. Volume and Surface Area 746-784

• Volume • Surface Area • Cube • Cuboid • Room • Box • Right Circular Cylinder • Solid Cylinder • Hollow Cylinder • Right Circular Cone • Frustum of Right Circular Cone • Sphere • Hollow Sphere or Spherical Shell • Hemisphere • Prism • Pyramid • Fast Track Techniques to Solve the Questions

TRIGONOMETRY

42. Trigonometric Ratios and Identities 785-820

• Trigonometric Ratios • Trigonometric Identities • Sign of Trigonometric Functions • Trigonometric Ratios of Compound Angles • Sine Rule • Cosine Rule • Maximum and Minimum Values of Trigonometric Functions

43. Height and Distance 821-835

• Line of Sight • Horizontal Line • Angle of Elevation • Angle of Depression

STATISTICS

44. Measure of Central Tendency 836-855

• Collection of Data • Presentation of Data • Frequency Distribution
• Cumulative Frequency • Mean • Properties of Mean • Median • Mode
• Relation between Mean, Median and Mode • Graphical Representation of Data

45. Measurements of Dispersion 856-862

• Range • Mean Deviation • Variance • Standard Deviation

46. Tabulation 863-885

47. Bar Graph 886-904

48. Line Graph 905-918

49. Pie or Circular Chart 919-933

50. Mixed Graph 934-950

51. Numerical Caselets 951-962

52. Data Sufficiency 963-975

53. Miscellaneous 976-982
